

#Challenge 5

Implementation of head tags in my project I learned from w3schools.

The screenshot shows a Visual Studio Code editor window with a project named "Final Portfolio Website". The Explorer panel on the left shows the file structure, including an "images" folder with files like "bglogo.png", "ems.png", "favicon.png", "mblogo.jpg", "mobilebg2.png", and "toplogo.png". The main editor area displays the "index.html" file, which contains the following code:

```
11 </head>
12 </body>
13 </div>
14 <div id="head">
15 <div class="header">
16 <div class="container">
17 
18 <nav>
19 <ul id="sidemenu">
20 <li><a href="#head">Home</a></li>
21 <li><a href="#about">About</a></li>
22 <li><a href="#services">Services</a></li>
23 <li><a href="#contact">Contact</a></li>
24 <i class="fa-regular fa-circle-xmark" onclick="closemenu()"></i>
25 </ul>
26 <i class="fa-solid fa-bars" onclick="openmenu()"></i>
27 </nav>
28 <div class="header-text">
29 <h3>Hello, Welcome to my Website</h3>
30 <h1>I'm <span>Donald Miranda</span><br>From Mlang Cotabato</h1>
31 <p>Studying at <span></span> University of Southern Mindanao.</p>
32 <div class="button">
33 <a href="" class="btn"><span><i class="fa-solid fa-circle-play"></i></span>
34 Watch and Discover!</a>
35 </div>
36 </div>
37 </div>
38 </div>
```

The bottom panel shows the "PROBLEMS" tab with a message: "Loading configuration.... Done loading configuration". The status bar at the bottom indicates the current position is "Ln 37, Col 7" and the file is encoded in "UTF-8" with "CRLF" line endings. The "Prettier" formatter is active.
