

## #Challenge 3

Layout and menus in relation to the planned website based on my learning on w3schools.

The screenshot shows the Visual Studio Code editor with a project named "Final Portfolio Website". The Explorer panel on the left shows the file structure: "images" (containing bglogo.png, ems.png, favicon.png, mblogo.jpg, mobilebg2.png, and toplogo.png), "index.html", and "style.css". The main editor displays the content of "index.html", which includes a head section, a container with a logo and a sidebar menu, and a header text section. The sidebar menu has links for Home, About, Services, and Contact, each with a corresponding icon and a close menu function. The header text section contains a welcome message, the user's name (Donald Miranda), their location (Mlang Cotabato), their university (University of Southern Mindanao), and a button to watch and discover more.
